THE REPLY FILED 12 November 2008 FAILS TO PLACE THIS	APPLICATION IN CONDITION	ON FOR ALLOWANCE.	
1. The reply was filed after a final rejection, but prior to or on tapplication, applicant must timely file one of the following reapplication in condition for allowance; (2) a Notice of Appear for Continued Examination (RCE) in compliance with 37 CF periods:	eplies: (1) an amendment, aff al (with appeal fee) in complia	idavit, or other evidence, wance with 37 CFR 41.31; or	hich places the (3) a Request
 a) The period for reply expires 3 months from the mailing date of b) The period for reply expires on: (1) the mailing date of this Ad no event, however, will the statutory period for reply expire lat Examiner Note: If box 1 is checked, check either box (a) or (b MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f) 	visory Action, or (2) the date set er than SIX MONTHS from the n). ONLY CHECK BOX (b) WHEN	nailing date of the final rejection	n.
Extensions of time may be obtained under 37 CFR 1.136(a). The date o have been filed is the date for purposes of determining the period of exteunder 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shat forth in (b) above, if checked. Any reply received by the Office later that may reduce any earned patent term adjustment. See 37 CFR 1.704(b). NOTICE OF APPEAL	ension and the corresponding am nortened statutory period for reply	ount of the fee. The appropria originally set in the final Offic	ate extension fee e action; or (2) as
2. The Notice of Appeal was filed on A brief in compli filing the Notice of Appeal (37 CFR 41.37(a)), or any extension Notice of Appeal has been filed, any reply must be filed wit AMENDMENTS	sion thereof (37 CFR 41.37(e)), to avoid dismissal of the	
3. The proposed amendment(s) filed after a final rejection, be (a) They raise new issues that would require further cons (b) They raise the issue of new matter (see NOTE below (c) They are not deemed to place the application in bette appeal; and/or	sideration and/or search (see /);	NOTE below);	
(d) ☐ They present additional claims without canceling a continuation Sheet. (See 37 CFR 1.11	6 and 41.33(a)).		
 4. The amendments are not in compliance with 37 CFR 1.12 5. Applicant's reply has overcome the following rejection(s): 6. Newly proposed or amended claim(s) would be allowed the plaint(s) 			,
non-allowable claim(s). 7. For purposes of appeal, the proposed amendment(s): a) how the new or amended claims would be rejected is provious The status of the claim(s) is (or will be) as follows: Claim(s) allowed: Claim(s) objected to: Claim(s) rejected: 25-34 and 37-48. Claim(s) withdrawn from consideration:] will be entered and an ex	xplanation of
AFFIDAVIT OR OTHER EVIDENCE			
 The affidavit or other evidence filed after a final action, but because applicant failed to provide a showing of good and was not earlier presented. See 37 CFR 1.116(e). 	sufficient reasons why the af	fidavit or other evidence is	necessary and
9. The affidavit or other evidence filed after the date of filing a entered because the affidavit or other evidence failed to ov showing a good and sufficient reasons why it is necessary	ercome <u>all</u> rejections under a	ppeal and/or appellant fails	s to provide a

Continuation of 3. NOTE: The Amendment of Claim 25, which claims the range of the precondensate at the first vaporization step significantly changes the scope of the claim ,thus, requiring new consideration and search, .

Continuation of 11. does NOT place the application in condition for allowance because: 1. Applicant argues that "Borner et al. does not teach a) a transetherification process and b) a two step vaporization process for concentrating the etherified melamine resin precondensate up to a concentration of 99 wt%, as presently claimed" Examiner disagrees. First, two step process claimed only in the presently amended claims. For the reason described above the amedments are not entered by Examiner. Regarding precondensate concentration, as cited in the previous Office Action that it would have been obvious to a person of ordinary skill in the art to obtain 95-99% solids in Borner et al.'s process in order to make the extrusion procedure more effective. In addition, a low amount of aggressive volatiles does not create any safety, corrosion and health issues during the above step of the process. 2. The same arguments are applicable to Adams et al 3.Regarding Horacek, Applicant argues that the Reference uses very strong - toluene sulfonic acid, which leads to uncontrollable molecular weight. This is incorrect. First, amount of the acid is very low (0.1-1%) (see Column 3, line 10). Second, Horacek does not exclude another acidic catalyst, stating that "usual catalysts can be added".

Applicant argues that Horacek uses melamine to formaldehyde ratio of 1 to (5-6), whereas Applicant uses ratio of 1 to (2-4). However, Horacek is a secondary reference, which modifies Borner providing exhibits low shrinkage during curing and good mechanical properties (high flexibility).
